RE: Owner's Letter of Recommendation

Dear Mr. Rink ,

GlobeTec Construction completed a water main replacement and gravity sewer installation for the City of Plantation approximately 3 years ago in Westgate Lake Manor subdivision. This work contained about 10,000 LF of water main, 14,000 LF of gravity main, private sewer lateral installation, 5 lift stations, abandonment of existing septic tanks and side walks installed through out the sub division. Their staff was professional as well as courteous to our residents. All complaints were handled in a timely manner. Completion of this project was completed on time and close to original budget. There were some change orders which extended the original contract time such as additional 12" FM and side walk installation. I would welcome bids from GlobeTec Construction on future projects and should you have any questions please do not hesitate to contact me at 954-797-2157.

Thanks,

Dan Pollio
Capital Improvement Administrator
City of Plantation
